

SANITARY PRESSURE REDUCING VALVE P173

DESCRIPTION

The ADCAPure P173 is a series of inline direct acting, diaphragm sensing pressure reducing valves.

These regulators, available with spring or dome-loading, are designed for use with clean steam, compressed air, water and other gases or liquids compatible with the construction materials and valve design.

MAIN FEATURES

Compact inline design.

Non-rising adjustment knob.

FDA / USP Class VI compliant seals.

Completely machined from bar stock material, no castings or forgings are used on the standard version.

STANDARD SURFACE FINISH

Internal wetted parts: ≤ 0,51 micron Ra – SF1.

External: ≤ 0.76 micron Ra – SF3.

Other surface conditions see IS PV20.00 E – Technical information.

Ultrasonic cleaning.

OPTIONS: Leakage line connection (1/8").

Different soft sealings for liquids and gases. Lock system, allows inline clean-in-place (CIP) and sterilization-in-place (SIP) operations.

Gauge connection on body.

Top cap (adjustment screw with cover). Bottom cover with drain connection.

USE: Clean steam, compressed air, water and

other gases and liquids compatible with the

construction.

AVAILABLE

MODELS: P173.

SIZES: 11/2" to 2"; DN 32 to DN 50.

REGULATING

RANGES: 0,8 to 1,5 bar; 1 to 3 bar; 1,5 to 5 bar.

CONNECTIONS: ASME BPE, DIN and ISO clamp ferrules or tube

weld (ETO) ends. Others on request.

PACKAGING: Assembling and packaging in a clean room

certified according to ISO 14644-1.

The product is end capped and sealed with recyclable thermo-shrinkable plastic film, to

avoid contamination.

INSTALLATION: Horizontal installation.

See IMI - Installation and maintenance

instructions.

| LIMITING CONDITIONS | | | | | | | | | |
|-----------------------------------|---------------------|--|--|--|--|--|--|--|--|
| Valve model | P173 | | | | | | | | |
| Body design conditions | PN 16 | | | | | | | | |
| Maximum upstream pressure | 8 bar or 4 bar * | | | | | | | | |
| Maximum downstream pressure | 5 bar | | | | | | | | |
| Minimum downstream pressure ** | 0,8 bar | | | | | | | | |
| Maximum operating temperature *** | 180 °C | | | | | | | | |

^{*} See "Flow rates coefficients" table.

facturer in case of other elastomer materials.

| CE MARKING (PED – Europea | |
|---------------------------|----------|
| PN 16 | Category |
| 11/2" to 2" – DN 32 to 50 | SEP |

^{**} For tight shut off, with the adjustment spring relaxed, ensure a minimum 0,2 bar downstream pressure.

*** With PTFE diaphragm and seals. Consult the manu-

FDA / USP Class VI seals certificate on request.

For viton diaphragm the only approval available is the FDA (pos. 7).

Valve without bottom drain connection, for clean gases

Valve with condensate drain for clean steam

^{*} Available spare parts; ** Others on request.
